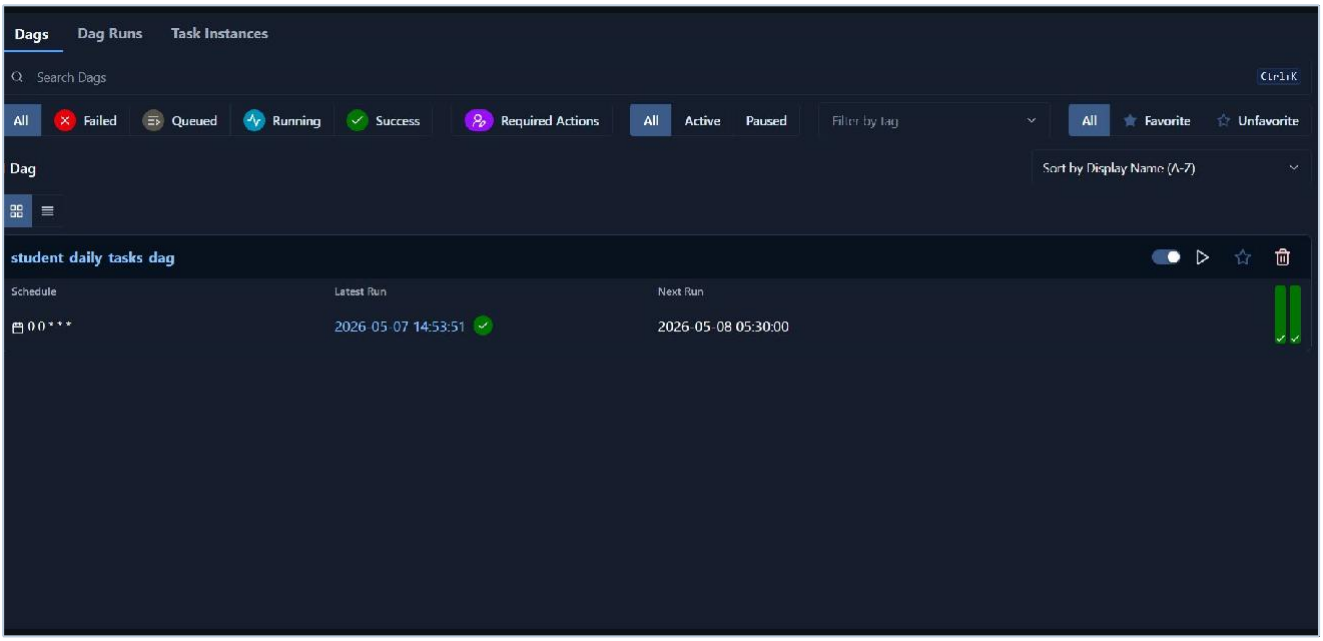
Apache Airflow — Live Dashboard Screenshots

student_daily_tasks_dag | Date: 2026-05-07 | Vaishali S | Data Engineering | Batch-2

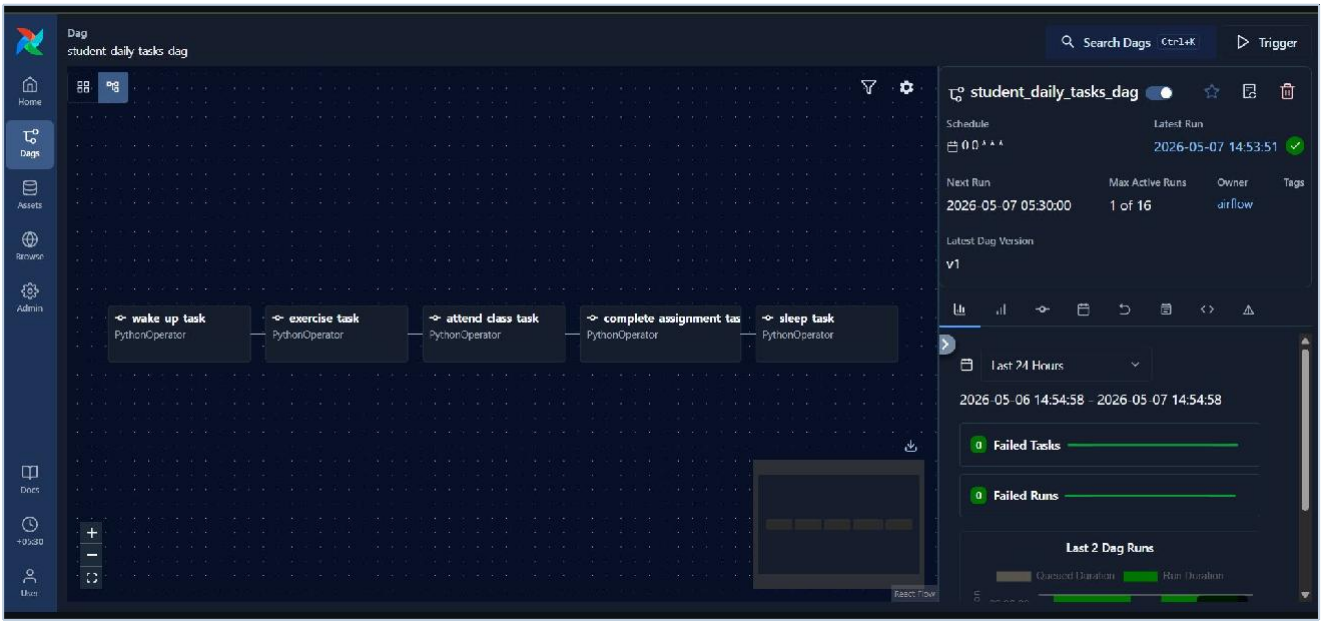
DAG Name	student_daily_tasks_dag
Schedule	0 0 * * * (Daily at midnight)
Latest Run	2026-05-07 14:53:51 ✓ Success
Next Run	2026-05-08 05:30:00
Total Tasks	5 (PythonOperator)
Failed Tasks (24h)	0
Failed Runs (24h)	0
Owner	airflow | Version: v1

Figure 1: Airflow DAGs Dashboard



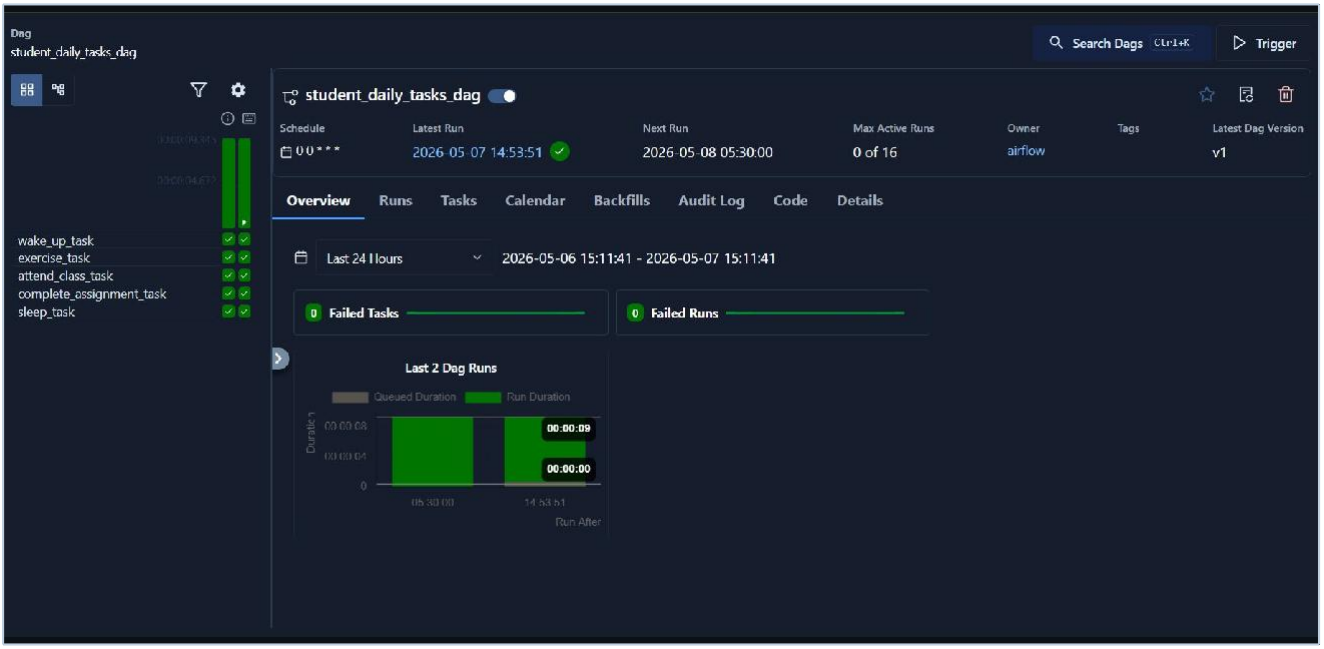
The main DAGs list view showing 'student_daily_tasks_dag'. The schedule is set to '0 0 * * *' (daily at midnight). The latest run on 2026-05-07 at 14:53:51 completed successfully (green tick). The next scheduled run is on 2026-05-08 at 05:30:00. The green bar on the right shows all recent runs were successful.

Figure 2: DAG Graph View — student_daily_tasks_dag



The Graph view of the DAG shows 5 tasks connected in a linear sequence using PythonOperator: wake_up_task → exercise_task → attend_class_task → complete_assignment_task → sleep_task. The right panel confirms Schedule: 0 0 * * *, Latest Run: success, Max Active Runs: 1 of 16, Owner: airflow, Version: v1. The last 24 hours show 0 Failed Tasks and 0 Failed Runs.

Figure 3: DAG Overview & Run History



The Overview tab shows all 5 tasks (wake_up_task, exercise_task, attend_class_task, complete_assignment_task, sleep_task) with double green checkmarks indicating 2 consecutive successful runs. The 'Last 2 Dag Runs' chart shows run durations of ~9 seconds (05:30 run) and ~9 seconds (14:53 run), with 0 queue wait time — both completed near-instantly.
